

Form Techniques: Example 3

Example 3

Form Control Accessibility

- [Example 1](#)
- [Example 2](#)
- [Example 3](#)

Example 3

Features

- ARIA Accessibility Techniques
- `aria-label` and `aria-labelledby` attribute for labeling
- Error feedback through pop messages
- `aria-describedby` used to reference error messages and instructions (e.g special)
- `aria-required` and `aria-invalid` attributes to mark required and invalid fields
- `focus` and `blur` events to improve focus highlighting of form controls
