

Functional Accessibility Evaluator (FAE) 2.0

- Designed for project managers, UX designers, developers and quality assurance testers to understand the level of accessibility of a web site they are developing or have administration responsibility
- Open source
- Analyzing multiple pages for accessibility features
- Organizes rules by Rule Categories, Rule Scope and WCAG Guidelines
- Website summary feature and implementation status
- Map rules to WCAG 2.0 Single A and AA requirements

FAE 2.0 Test Prototype

Functional Accessibility Evaluator 2.0 beta (Public Testing Version)

Version 2.0.0a

A project of the Open Accessibility Alliance and OpenAjax Accessibility Task Force
