

First Steps

- Working with specific web developers on campus to bring their web resources into WCAG 2.0 compliance:
 - Disability Services
 - IT Accessibility
 - College of Applied Health Studies
 - Library
 - Office of Public Affairs
- Verifying the accessibility features of common web development libraries (e.g. bootstrap.js and jquery-ui) and adding supplemental scripts to improve accessibility
- Testing and validating the OpenAjax rules (Issue Tracker)
- Testing the and improving the utility and usability of the open source tools
